M DCCC XXXVIII.

RAPPORT AU ROI.

SIRE,

Lorsqu'en 1835 l'un de mes prédécesseurs eut l'honneur de mettre sous les yeux de Votre Majesté le premier essai des travaux statistiques qui devaient être publiés par le ministère du commerce, il présenta en même temps la nomenclature des documents à recueillir sous les titres suivants :

TERRITOIRE, — POPULATION, — AGRICULTURE, — MINES, — INDUSTRIE, — COMMERCE, — NAVIGATION, — COLONIES, — ADMINISTRATION INTÉRIEURE, — FINANCES, — FORCES MILITAIRES, — MARINE, — JUSTICE, — INSTRUCTION PUBLIQUE.

Dès l'année dernière, j'ai offert à Votre Majesté le premier volume de ce vaste recueil, comprenant, dans l'ordre indiqué, tout ce qui se rapporte au territoire et à la population de la France.

Le deuxième volume devrait donc traiter de l'agriculture; mais le temps qui s'est écoulé depuis que le travail de la statistique est entrepris, n'a pu suffire, malgré de constants efforts et la plus active correspondance avec les préfets, à

recueillir, pour nos quatre-vingt-six départements, toutes les données relatives à une exploitation de plus de 40 millions d'hectares. Les difficultés que cet immense travail rencontre aujourd'hui sont les mêmes qui l'ont fait abandonner à d'autres époques; mais elles ne nous ont pas paru insurmontables. Je puis maintenant donner à Votre Majesté l'assurance que ce travail sera complété, non pas d'abord d'une manière parfaite, mais avec les meilleurs éléments que l'on ait encore pu rassembler; et une fois que le cadre en sera établi, il n'y aura plus qu'à procéder à la rectification des faits; il suffira d'un petit nombre d'années pour donner à la France une description de ses richesses agricoles, plus détaillée et plus exacte que celle d'aucun autre pays.

Le regret que j'éprouve, de ne pouvoir suivre le programme convenu, serait plus vif encore si je n'avais pas, il y a quelques mois, fait distribuer aux Chambres un volume d'archives statistiques qui renferme des documents sur de nombreux faits agricoles : le prix et le commerce des céréales, les variations des récoltes, le recensement des bestiaux, la consommation de la viande et les quantités de vins et d'eaux-de-vie qu'atteint l'octroi des villes.

Forcé d'intervertir l'ordre de la publication, je présente aujourd'hui à Votre Majesté un deuxième volume de la statistique de France, qui fait connaître les principaux éléments de notre commerce extérieur.

On ne saurait choisir une époque plus opportune pour mettre en évidence les faits de cette nature. Le maintien de la paix accroît rapidement nos relations de commerce avec le dehors; et tous les jours on sent davantage la nécessité d'apporter, dans les tarifs, des modifications de plus en plus favorables à la multiplication des échanges : or, ces modifications ne peuvent trouver de bases rationnelles que dans la connaissance exacte et certaine du plus grand nombre de faits numériques possibles, classés avec méthode.

Ce qui donne encore un mérite d'à propos à l'ensemble des faits que mon département a réunis sur le commerce, c'est que la publication de ce recueil coïncide avec celle du résumé décennal des états de douanes que Votre Majesté a chargé le département des finances de donner aux Chambres; ces deux recueils se complètent l'un par l'autre.

Jamais les méditations des hommes d'État et les travaux des administrateurs n'auront été aidés et provoqués par plus d'informations positives et méthodiques.

Ainsi la France présente la première le tableau authentique et sans réserve de tous les résultats de son commerce : elle montre la part que chaque pays étranger y prend par l'échange de tels et tels produits; elle donne le moyen d'apprécier

l'effet des changements qu'éprouvent nos tarifs et ceux des autres puissances, et, il faut le dire, les chiffres ont, pour concilier tous les intérêts, plus d'éloquence que les déductions des théoriciens. Il va devenir possible de voir quels ont été chaque année, pendant un quart de siècle, les progrès de notre industrie manufacturière, par le prodigieux accroissement de ses consommations en matières brutes tirées d'Europe ou d'outre-mer, et quels sont ceux de nos produits agricoles qui peuvent être placés au dehors malgré la concurrence des pays où la valeur du sol et le prix des salaires sont moins élevés que chez nous.

Dans le travail que je soumets à Votre Majesté, je me suis abstenu de tirer des faits aucune déduction; je me suis uniquement appliqué à rendre leur étude facile et leurs résultats évidents, de manière que leur ensemble présentât le tableau du commerce de la France le plus complet possible; il embrasse, en effet, l'espace d'un demi-siècle, et il expose l'histoire de nos transactions commerciales avec chaque pays des deux hémisphères.

Un aperçu de la division de l'ouvrage va me fournir l'occasion de signaler quelques-uns de ses plus importants résultats.

Ire SECTION.

Cette première partie offre, dans une série de tableaux, des notions générales sur le commerce de la France, et sur les valeurs qui ont été mises en circulation pendant cinquante ans. Elle fait connaître d'abord quelle a été l'importance de nos échanges, de 1787 à 1810, et comment ils ont été répartis entre les diverses puissances. Elle présente ensuite, par années, le détail des valeurs qui ont fait l'objet du commerce spécial et du commerce général, de 1825 à 1837, en divisant les marchandises par classes. Ces indications sont complétées par l'évaluation du transit et du mouvement des entrepôts pendant plusieurs des dernières années.

L'ensemble de ces tableaux permet de suivre d'un coup d'œil les variations que chaque événement fait éprouver à la consommation sur tous les points. Il permet de voir pour quelle quantité telle classe de marchandise entre dans la masse des échanges, et par là même quels sont les pays qui consomment, quels sont ceux qui produisent, ceux dont l'activité est progressive, et ceux dont le commerce est rétrograde ou devient stationnaire.

Le commerce maritime a été l'objet d'un travail particulier : on y trouve le

nombre et le tonnage des navires français ou étrangers arrivés ou partis depuis 1822, et la valeur moyenne de leur cargaison. Il est intéressant d'examiner le progrès de la richesse dont la navigation est le moteur puissant, et qui s'est élevée de cinq cents à treize cents millions dans l'espace de quelques années.

Les quatre derniers tableaux décrivent les mouvements des métaux précieux monnayés ou en lingots. Quoiqu'il n'y ait pas de fait plus difficile à constater intégralement que le passage à la frontière des choses de grand prix, il est néanmoins utile de remarquer que la somme de ces importations, enregistrées par la douane dans l'espace d'un demi-siècle, a surpassé les exportations de deux milliards de francs. Ce n'est pas à dire que cette somme compose une balance en notre faveur, comme on aurait dit autrefois; nous l'avons sans doute rendue en grande partie à l'étranger, soit en même nature, selon le cours du change, soit en ouvrages d'or et d'argent fabriqués par la bijouterie, l'orfévrerie, l'horlogerie, etc., ou filés, laminés, employés de diverses façons dans les riches tissus, ou dans d'autres combinaisons des arts; mais toujours est-il qu'elle a été l'élément d'une foule d'opérations profitables.

2e SECTION.

Cette partie de l'ouvrage offre, dans une série de quarante-six tableaux, l'histoire des relations de notre commerce avec les principaux points du globe. Il était essentiel, en effet, après avoir fait connaître le commerce dans son ensemble, de le montrer dans ses divisions par pays de provenance ou de destination, en donnant, pour une période de seize années, le compte d'entrée et de sortie de chacune des principales marchandises reçues de tel pays ou dirigées sur tel autre, soit pour la consommation, soit pour le commerce, par les entrepôts. Les chiffres de ce compte montrent exactement le mouvement des échanges de telle ou telle marchandise. Ils méritent la plus grande confiance, car ils expriment des quantités vérifiées sur place, et non des valeurs établies d'après un taux officiel, qui ne peut jamais être qu'une approximation plus ou moins voisine de la vérité.

En voyant ainsi comment le commerce particulier à telle contrée s'étend ou se resserre sous l'influence de certains accidents, ou par l'effet continu des tarifs, l'administration peut mettre à profit l'expérience du passé; et le négociant trouve un guide dans le choix des produits qui doivent servir à ses échanges avec chaque colonie ou pays étranger.

La récapitulation qui accompagne le tableau relatif à chaque puissance offre, dans l'ordre chronologique, la valeur des importations et des exportations des seize dernières années, entre lesquelles les rapprochements deviennent faciles. Elle comprend même des indications qui remontent à des époques antérieures à la révolution. Peut-être est-il plus curieux qu'utile de rapprocher des temps si éloignés; mais si l'on met en regard les deux années peu distantes de 1825 et de 1836, il y a un véritable intérêt à constater que les transactions commerciales, prises dans leur ensemble, se sont considérablement étendues.

L'accroissement de nos transactions commerciales a été, en Europe, de 361 millions, ou presque de moitié;

En Afrique, de 18 millions, ou des deux tiers;

En Asie, de 39 millions et demi, ou de plus de sept fois leur valeur;

En Amérique, de 225 millions, ou presque du double;

Enfin, pour les colonies et les pêcheries, il a été de 22 millions, ou d'un cinquième.

Au total, notre commerce général s'est accru, en dix ans, de 668 millions de francs, ou de moitié de la valeur qu'il atteignait en 1825. A cette dernière époque, il montait à 1200 millions; en 1836, il s'élevait à 1866 millions.

3e SECTION.

Le commerce extérieur de la France se présente, dans cette partie de l'ouvrage, sous un autre point de vue: au lieu de le décrire, comme dans la section précédente, d'après les régions du globe d'où proviennent les marchandises, ou pour lesquelles elles sont destinées, on prend ici les marchandises elles-mêmes pour bases de la division du travail, et l'on trace l'historique de celles qui ont le plus d'importance, c'est-à-dire, de celles dont le mouvement excède un million de francs. Cent cinquante-six tableaux sont consacrés à cette étude; ils sont répartis en deux grandes catégories: l'une relative aux importations; l'autre aux exportations. On apprend par ces tableaux quelles sont les matières exotiques, nécessaires à l'industrie dont la consommation a pris le plus grand développement; — quelles quantités d'objets naturels fournissent à nos besoins les pays voisins, les colonies et la pêche maritime; — quels produits fabriqués par l'étranger sont admis en échange des nôtres; — quelles sont celles des productions de notre agriculture expédiées pour les pays d'outre-mer.

De ces divers aperçus résulte une appréciation circonstanciée de la vente des produits de notre sol et de nos manufactures.

En rapprochant les faits de 1836 de l'époque la plus prospère des temps de la restauration, on trouve que nos principales consommations appellent du dehors deux fois autant de marchandises. Il en est ainsi pour les cotons en laine, les bois à construire, les peaux brutes, les fils de lin et de chanvre, la fonte, le fer et l'acier, la houille, le plomb, les feuillards et merrains, les produits de la pêche et d'autres objets nombreux. La production indigène n'a laissé prendre qu'une augmentation d'un quart ou de moitié en sus à l'importation des lins et chanvres bruts, des soies et des sucres. Mais la valeur des laines importées a plus que triplé, et celle du zinc s'est élevée jusqu'au septuple. Quelques articles, parmi lesquels on doit citer les toiles, l'indigo et le café, ont, au contraire, subi une diminution ou sont restés au même terme. Néanmoins, il s'est opéré, sur la masse entière des marchandises importées, introduites dans la consommation intérieure, une augmentation de 64 millions, — équivalant aux deux cinquièmes de la somme des importations.

La valeur de l'exportation de nos produits agricoles et industriels s'est augmentée dans des proportions analogues; elle a doublé, et au delà, pour la garance, les liqueurs, les sels marins et les sels de salines, la mercerie et l'industrie parisienne, l'horlogerie, les gravures et lithographies, et les meubles. Elle a triplé pour la porcelaine, les grands miroirs, les machines et mécaniques, et quadruplé pour les chardons cardières et pour les produits de la pêche maritime.

Les tissus, qui forment près de la moitié de la valeur de nos exportations, ont eu part à ces progrès. Les étoffes de coton se sont élevées de 42 à 65 millions; les lainages ont gagné un tiers; les soieries un septième, et les tissus de lin et de chanvre un neuvième.

Nous avons à regretter que l'une de nos plus importantes productions, celle des vins, n'ait pas suivi ce mouvement ascensionnel: les vins, en effet, n'ont éprouvé dans leur vente au dehors qu'une amélioration d'un quatorzième, et les eaux-de-vie ont subi une perte d'un tiers.

En dernière analyse, on reconnaît, d'une part, que les exportations des produits français, qui, en 1825, représentaient une valeur de près de 544 millions, se sont élevés, en 1836, à 629 millions, ce qui fait un accroissement de 85 millions ou près d'un sixième; et, d'autre part, que le commerce spécial (importations et exportations réunies) a excédé, en 1836, la valeur qu'il avait en 1825, de 250 millions ou de plus d'un quart en sus: c'est presque le double du commerce général de l'ancienne France en 1788.

C'est là, SIRE, un des nombreux témoignages qui attestent les progrès que les sociétés modernes ont faits depuis la double émancipation des industries, en Europe, et des colonies, dans l'Amérique septentrionale. Les populations se sont accrues, et le pouvoir de satisfaire à leurs besoins s'est développé plus rapidement encore. L'essor des intelligences s'est dirigé vers les moyens de dominer la matière, et d'en multiplier les applications utiles. La paix et le travail créent incessamment des capitaux qui déterminent de nouvelles consommations, en même temps que parmi nous les classes autrefois les plus dénuées de toute importance politique éprouvent le besoin de rehausser, par des habitudes quelque peu somptueuses, la dignité qu'elles ont reçue de notre nouvel ordre constitutionnel. C'est désormais à l'achèvement des voies de communication qu'il appartiendra d'augmenter encore ces rapides échanges de peuple à peuple, échanges qui n'ont pas seulement pour objet les produits matériels, mais aussi les idées, et qui, en mettant les personnes elles-mêmes en rapport, détruisent des préventions vulgaires, excitent des sentiments de bienveillance, et deviennent ainsi la plus forte garantie de la durée de cette paix générale, qui, si elle ne fait de notre âge le commencement d'une ère nouvelle parmi les nations, le marquera du moins d'un large signe de prospérité.

SIRE, ce sont vos vœux que j'exprime. Mon devoir est d'en seconder l'accomplissement autant qu'il est en moi. Ma récompense sera d'avoir répondu à l'attente de Votre Majesté.

Je suis avec respect,

DE VOTRE MAJESTÉ,

SIRE,

Le très-humble, très-dévoué et très-fidèle serviteur,

Le Ministre des Travaux publics, de l'Agriculture et du Commerce,

N. MARTIN (du Nord).

14 Avril 1838.

TABLE PAR ORDRE DE MATIÈRES..... XIII.

VII^e^ PARTIE.

COMMERCE EXTÉRIEUR..... 1.

SOMMAIRE DES SECTIONS..... 3.

SECT. I. *Tableaux généraux du commerce extérieur de la France.*. 5.

—— II. *Tableaux spéciaux du commerce de la France avec les colonies et l'étranger, divisés par pays de provenance et de destination*..... 41.

—— III. *Tableaux du commerce extérieur de la France, divisés par marchandises principales, selon la nature et l'objet de chacune d'elles*..... 187.

I^re^ SECTION.

TABLEAUX GÉNÉRAUX DU COMMERCE EXTÉRIEUR DE LA FRANCE..... 5.

A. *Commerce ancien, par provenances et destinations, de 1787 à 1810*..... 6.

B. *Commerce général et spécial, de 1815 à 1837*..... 8.

Pages.

C. *Commerce maritime, par provenances, destinations et cargaisons, de 1822 à 1837*..... 12.

D. *Commerce avec chacun des pays de l'Europe, de 1821 à 1837*..... 16.

E. *Commerce avec les colonies et les pays hors de l'Europe, de 1825 à 1837*.. 20.

F. *Valeurs, par pays de provenance et de destination, des différentes classes de marchandises importées et exportées, de 1825 à 1837*..... 24.

G. *Valeurs du numéraire et des lingots importés et exportés, de 1787 à 1810, et de 1825 à 1837*..... 34.

A. *Commerce ancien, par provenances et destinations, de 1787 à 1810*..... 6.

N° 1. Tableau, par années, des valeurs de l'ancien commerce de la France, de 1787 à 1810, divisé par pays de provenance et de destination..... 6.

Ce tableau a été exécuté au moyen des matériaux recueillis par l'ancien bureau de la Balance du commerce, dirigé par Arnould.

B. *Commerce général et spécial, de 1815 à 1837*..... 8.

N° 2. Tableau général du commerce extérieur de la France, de 1815 à 1837, divisé par classes de marchandises importées et exportées..... 8.

1° Commerce spécial..... 8.

2° Commerce général..... 10.

3° Transit..... 10.

4° Entrepôts..... 10.

Ce tableau, ainsi que tous ceux dont est composé ce volume, a été exécuté par le Bureau de la statistique générale de France, au moyen des chiffres officiels de l'Administration des douanes, consignés, de 1815 à 1837, dans les documents manuscrits ou imprimés fournis chaque année, par cette administration, au Département du commerce. Les chiffres seulement ont été empruntés à ces documents, car, leur objet n'étant point ici le même, leur agroupement et leur disposition diffèrent essentiellement.

On a fait usage, dans tout le cours de ce travail, de la division lumineuse adoptée depuis 1825 dans les documents commerciaux de la France, et qui manque encore dans ceux des autres puissances commerciales. C'est la répartition, en deux catégories, de toutes les marchandises, selon leur origine ou leur destination. L'une a le titre de *Commerce spécial;* elle comprend, à l'importation, les objets introduits dans la consommation, et à l'exportation, ceux provenant de l'industrie agricole ou manufacturière du pays; l'autre, désignée par le nom de *Commerce général,* comprend, à l'im-

Pages.

portation, toutes les marchandises arrivées, quelle que soit leur destination ultérieure, et, à l'exportation, toutes celles qui sortent du territoire, quelle que soit leur origine, nationale ou étrangère.

Les valeurs ont été formées en appliquant à chacune des marchandises, selon son espèce ou sa variété, le taux d'évaluation déterminé officiellement en 1824. Toutefois, pour les froments, on a substitué à ce taux invariable, les prix moyens, qui sont donnés par les mercuriales des départements par où les blés ont été importés ou exportés.

C. *Commerce maritime, par provenances, destinations et cargaisons, de 1822 à 1837* ..... 12.

N° 3. Tableau, par années, des valeurs du commerce maritime de la France, de 1822 à 1837, divisé par provenances et destinations, avec la valeur moyenne des cargaisons des navires, à l'importation et à l'exportation ..... 12.

Ce tableau a pour objet de faire connaître séparément la richesse annuelle du commerce maritime et celle du commerce par terre; il permet aussi d'apprécier les variations qui ont eu lieu, pendant une période de quinze ans, dans les valeurs moyennes des cargaisons des navires français et étrangers.

D. *Commerce spécial et général avec chacun des pays de l'Europe, de 1821 à 1837* ..... 16.

N° 4. Tableau, par années, des valeurs du commerce de la France avec chacun des pays de l'Europe, de 1821 à 1837, exclusivement au numéraire et aux lingots ..... 16.

1° Importations ..... 16.

2° Exportations ..... 18.

Ce tableau donne une connaissance sommaire et comparative des transactions commerciales de la France avec chacune des principales puissances de l'Europe pendant une période de seize ans. En le rapprochant du tableau n° 1er, on peut suivre les progrès de notre commerce avec ces puissances pendant un demi-siècle.

E. *Commerce spécial et général avec les colonies et les pays hors de l'Europe, de 1825 à 1837* ..... 20.

N° 5. Tableau, par années, des valeurs du commerce de la France avec chacune de ses colonies et avec les pays hors de l'Europe, de 1825 à 1837, exclusivement au numéraire et aux lingots ..... 20.

1° Importations ..... 20.

2° Exportations ..... 22.

Ce tableau continue le précédent à l'égard des colonies et des pays hors d'Europe.

Pages.

F. *Valeurs, par pays de provenance et de destination, des différentes classes de marchandises importées et exportées, de 1825 à 1837* ..... 24.

N° 6. Tableau, par pays de provenance, des valeurs des différentes classes de marchandises importées de 1825 à 1837..... 24.

1° Matières nécessaires à l'industrie..... 24.
2° Produits naturels..... 26.
3° Produits fabriqués..... 28.

N° 7. Tableau, par pays de destination, des valeurs des différentes classes de marchandises exportées, de 1825 à 1837..... 30.

1° Produits naturels..... 30.
2° Objets manufacturés..... 32.

Ce tableau et le précédent donnent, par masses, les valeurs des marchandises importées et exportées, distribuées par classes selon leur origine et leur destination. On conçoit bien que cette division ne peut offrir des résultats rigoureux, mais elle indique suffisamment la part que prend dans le commerce de la France chacun des pays agricoles ou manufacturiers des deux hémisphères.

G. *Valeurs du numéraire et des lingots, importés et exportés de 1787 à 1810, et de 1825 à 1837*..... 31.

N° 8. Tableau, par années, des valeurs du numéraire importé en France et exporté de France, de 1787 à 1810, divisé par pays de provenance et de destination..... 34.

Les nombres de ce tableau appartiennent aux matériaux recueillis anciennement par le bureau de la Balance du commerce.

N° 9. Tableau, par années, des valeurs du numéraire et des lingots importés en France, de 1825 à 1837, divisé par pays de provenance..... 36.

Il faut prendre comme un minimum la plupart des chiffres de ce tableau et de ceux qui le précèdent et le suivent, attendu qu'une partie importante du mouvement des métaux précieux échappe partout à la constatation.

N° 10. Tableau, par années, des valeurs du numéraire et des lingots exportés de France, de 1825 à 1837, divisé par pays de destination..... 38.

Pages.

Récapitulation sommaire du numéraire importé et exporté, et de son accroissement par années, depuis 1787 ..... 40.

On ne peut tirer de ce tableau que par une induction vague quelques notions sur la masse du numéraire en circulation, attendu d'abord que les mouvements des métaux précieux ne sont constatés que partiellement, et qu'il faudrait ensuite ajouter à ceux exportés, les quantités d'or et d'argent qui entrent dans la bijouterie, l'orfévrerie, l'horlogerie et les tissus mélangés de ces matières, vendus chaque année à l'étranger.
